

## **HOW SAFE ARE YOUR VEGGIES PROJECT**

**SEPTEMBER, 2017**

Fifty (50) capsicum samples were collected randomly in the month of September, 2017 from the markets in the areas of Shamshabad, Mehdipatnam, Upparapalli, Dairy farm, Hyderguda and Gudimalkapur.

The samples were analysed for pesticide residues using validated method with confirmatory analysis on GC-MS/MS at 10 PPB (Parts per Billion) level.

Out of 50 samples analysed, no sample found contaminated with pesticide residues.
