INTRODUCTION

India is an agrarian country with more than 60% of its population directly or indirectly dependent on agriculture. The substantial increase in agricultural and horticultural production over the years has helped to meet the food security needs of the country. In India, the major constraints limiting higher productivity are the attack of insect pests, diseases and weeds which are favoured by intensive agriculture. The changes in climatic regimes play a significant societal challenge and a lot of changes in biogeography and dynamics of pests. With the increasing awareness on lifestyles and increasing demand for organic food, pest control strategies are slowly shifting towards more sustainable, ecologically sound and economically viable options.

About NIPHM

National Institute of Plant Health Management (NIPHM) is a premier national level institute under the administrative control of the Department of Agriculture, Cooperation and Farmers Welfare, Government of India. Established in the year 1966 at Hyderabad, the Institute, as approved by the Union Cabinet, was converted as an autonomous body on 24th October, 2008 with an expanded scope of promoting environmentally sustainable Plant Health Management practices in diverse and changing agro-climatic conditions and Plant Biosecurity Management and Pesticide Management through capacity building programmes, besides providing inputs for policy formulation on Plant Health Management, Plant Biosecurity, Invasive Alien Species, market access, etc. at state and national level.

The capacity building programmes in different areas are offered by NIPHM through on campus programmes at Hyderabad as well as off campus programmes in India and foreign countries by its following 4 major technical divisions: a) Plant Health Management, b) Plant Biosecurity, c) Pesticide Management and d) Information and Communication Technology. NIPHM also specializes in Plant Health Engineering and Vertebrate and Urban Pest Management.

Aim of the Training Programmes

Develop a committed and competent cadre on professional to promote sustainable plant health and biosecurity management in India and her neighbourhood.

A BRIEF OUTLINE OF ACTIVITIES

Post Graduate Diploma in Plant Health Management (PGDPHM): 1 Yr Programme

The programme develops expertise in Plant health management, the science and practice of understanding and overcoming the biotic and abiotic factors that limit plants from achieving their full genetic potential as crops. The programme also imparts skills to address the emerging challenges in Biosecurity and Pesticide Management. The programme is open for Graduates in Agriculture/Horticulture and Post Graduates in Life Sciences.

Plant Health Management

Good plant health management plays a vital role in overcoming various biotic and abiotic stresses that limit the crop from achieving its full genetic potential. The indiscriminate use of pesticides and fertilizers had resulted in wide spread environmental pollution and destruction of the agro ecosystem. To promote environmentally sustainable plant health management for improving the soil and plant health and to reduce the excessive reliance on chemical pesticides, Plant Health Management division is organizing various training programmes on bio-intensive approaches for plant health management with emphasis on Ecological Engineering, Low cost on-farm production of bio agents and Agro Eco-System Analysis. PHM division is also conducting training programmes to Agriculture / Horticulture Extension officials and KVK Scientists of ICAR and State Agriculture Universities, on establishment of mother cultures of bio-agents, bio-pesticides and bio-fertilizers who in turn supply the mother cultures and enable the farmers to produce high quality bio-pesticides and bio-fertilizers with low cost.

Plant Biosecurity

Significance of Pest Risk Analysis, Pest Surveillance and diagnostics in biosecurity management and threats of invasive alien species in the context of globalization are highlighted besides exposure to SPS Measures and the relevant International standards.

Pesticide Management

Crop Protection Chemicals play a vital role in achieving higher food production to meet the ever increasing demand for food and nutritional security. The pesticides being hazardous, their use must be regulated to ensure quality of pesticides imported/produced/sold, as well as their use as per good agricultural practices, so that the pesticide quality is maintained and residues are within prescribed limits for food safety. The division developed capacity building programs to impart knowledge and skills in pesticide management among inspectors, regulators, extension officials, analysts, scientists, laboratory managers. The Division has state-of-the-art training and analytical facilities (accredited as per ISO/IEC 17025:2005) to provide hands-on experience and refresher trainings on inspection and sampling, method validation principles, quality control, documentation, analysis of pesticide formulations and residue analysis in various matrices.

Vertebrate and Urban Pest Management

Provides an in-depth analysis of integrated rodent pest management (RPM) that is woven around the ecology and ethology of rodents in diverse agro-ecosystems. Some programmes cater to the requirement of RPM in urban areas, to prevent spread of dreaded Zoonotic diseases such as plague, leptospirosis, scrubtyphus etc.

Plant Health Engineering

Focuses on appropriate engineering systems for pesticide application, calibration of the appliances for proper delivery regime, safe, judicious and efficacious use of pesticides. The significance of droplet size and drift in enhancing bioefficacy will be unravelled.

Courses for Directorate of PPQ&S

Induction training programme for new recruits and transferees and refresher courses for the Officers in biosecurity and plant health management.

Training Programmes for Private/Public Sector/NGOs

Programmes in AESA based plant health management, phytosanitary treatment (M.Br./AI P Fumigation), production protocol for Biocontrol agents and biopesticides, urban IPM, Pesticide Formulation and Residue Analysis, Instrumentation in Pesticide Analysis etc. are offered on payment basis.

Admission to the Programmes

- Officials from different States/Union Territories, SAUs, ICAR, KVKs, NGOs and Private Sector may be nominated and the nominations should reach the Registrar/Course Director well in advance. On-line registration has been facilitated in the NIPHM Website <https://niphm.gov.in>
- There is no training fee for State/ Central Govt. officials. Free boarding and lodging facility will be provided at the Institute Hostel in addition to the travel expenditure as per entitlement.
- Industry/NGOs and other Organisations can also sponsor their officials on payment basis.
- Unemployed Agricultural Graduates can also enroll for the programmes on payment basis.
- Accommodation shall be provided only to the trainees on twin sharing basis.
- TA and DA shall be reimbursed as per Government of India norms for government employees.

Training Schedule April 2019 To March 2020

Facilities Available

Training Facilities (viz Lecture Halls/Seminar Halls/Auditorium etc.):

NIPHM institute is equipped with two Auditoriums (with capacity of 250 seats and 81 seats) for conducting different Seminars/Workshops/Meetings/International and National training programmes of importance. In addition, 05 Lecture Halls along with two International Conference Halls are present at NIPHM which are used for conducting the regular training programmes. All the training facilities are provisioned with projector, screen, PC system and other facilities for conducting trainings. The facilities are being upgraded on a continuous basis.

ICT Infrastructural facilities

The institute is provided with state-of-the-art computer centre with 24 x 7 internet facility and power-backup. Free Wi-Fi is provided to the trainees round the clock.

Research, Testing and Technology Demonstration Laboratories (Labs)

NIPHM has established subject specific sophisticated state-of-the-art laboratories for demonstration of low cost technologies to the trainee officers and farmers during the training programmes. The Pesticide Management Division of NIPHM has state-of-the-art training and analytical facilities accredited as per ISO/IEC 17025:2005.

Agriculture Farm

The institute has around 10 acres of dedicated agricultural farm which is used for demonstration trials of AESA, Ecological Engineering for Pest Management etc., to the participants.

Library

The library is a good source of books and various documents related to varied domains, with specific emphasis on agriculture. It has a rich collection of books, reputed journals on plant protection, plant health management and allied fields. The library has large numbers of technical

books and old volumes of journals in various vernaculars. The trainees and researchers also can access journals, both National and International. Apart from printed volumes, trainees, staff and students can access e-resources.

Hostel Accommodation

NIPHM provide hostel facilities of high standards. There are two hostels with 110 Air Conditioned (AC) rooms having double occupancy facility. All the rooms are provided with 24x7 cold/hot water facility, uninterrupted power supply and supported by good in-house cafeteria / canteen. The hostels are also equipped with facilities like WIFI Internet, Television facility etc.
